EXPERIENCE

- **Zoop** Remote
Front-end Developer Mar 2023 - Jun 2023
 - Revamped admin panel, streamlining tasks and empowering administrators with intuitive controls and insightful analytics.:
 - Integrated dynamic poll function to foster user engagement and community interaction.:
 - Developed custom components tailored to Zoop's unique requirements, optimizing UI elements and driving user satisfaction.:

PROJECTS

- **OCHI:** Developed a modern frontend project named "OCHI" using React and Vite. Implemented dynamic and interactive user interfaces with React and enhanced animations using Framer Motion and GSAP. Integrated Locomotive Scroll for smooth scrolling effects. Utilized TailwindCSS for efficient and responsive styling. link :: <https://ochi-co.vercel.app/>
- **Sorting Visualizer:** I developed a 'Sorting Visualizer,' a project that demonstrates various sorting techniques, allowing users to understand the differences in speed and functionality between them. The technologies I used in this project are React, HTML, CSS, and JavaScript. link :: <https://sorting-visual-flame.vercel.app/>
- **Todolist:** created a fully functional todolist app using React js and Redux link :: <https://portfolio-website-sand-theta-60.vercel.app/>
- **Portfolio:** Created a personal portfolio website using Tailwind CSS and React, incorporating Framer Motion for smooth animations and Locomotive Scroll for advanced scrolling effects. link :: <https://portfolio-website-sand-theta-60.vercel.app/>
