Education

G H Raisoni College of Engineering (GHRCE), B.tech in Data Science

Aug 2023 – July 2026

- CGPA: 7.22/10.00
- **Coursework:** Python, Machine Learning, Deep Learning, SQL

Skills

- **Language:** Python, C++, SQL.
- **Libraries and Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn.
- **Databases and Tools:** MySQL, PostgreSQL, Power BI.
- **Core Subjects:** Data Structure and Algorithms, Object-Oriented Programming, Database Management Systems, Data Visualization.
- **Soft Skills:** Presentation Skills, Leadership, Problem Solving, Effective Communication, Team Collaboration.

Experience

Data Science Intern, Bharat Intern – Bhopal, Madhya Pradesh (Remote)

May 2024 – June 2024

- Enhanced Titanic dataset prediction accuracy by 80% using a machine learning model.
- Developed and deployed a CNN model for Dogs vs. Cats classification, achieving 85% accuracy and improving model efficiency by 30%.
- Built an SMS Spam Classifier using NLP techniques, achieving 95% precision through effective data preprocessing and model tuning.

Microsoft Learn Student Ambassador, Microsoft – Redmond, WA (Remote)

July 2024 – Mar 2025

- Conducted 5+ interactive workshops on Microsoft Copilot, educating over 200 students and enhancing technical awareness.
- Provided LinkedIn Premium access to active participants, fostering professional growth.
- Enhanced engagement through impactful initiatives and collaborative efforts.

Projects

WhatsApp Chat Analyzer

- Developed a WhatsApp Chat Analyzer using Python, analyzing over 5,000 messages for actionable insights.
- Integrated machine learning models, improving trend detection accuracy by 20%.
- Built an interactive GUI using Streamlit, enhancing user experience and boosting accessibility.
- Visualized insights with Matplotlib and Seaborn, improving data interpretation by 30%.
- Tools Used: Python, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Streamlit, Regex (Regular Expressions).

BitShield - Secure Bitcoins News App

- Developed secure Python app with encrypted data transmission ensuring 100% data privacy.
- Integrated APIs for real-time news updates, enhancing user experience and engagement. APIs to deliver real-time news updates from verified sources.
- Improved user interaction with intuitive UI features such as image displays and categorized headlines.
- Tools Used: Python, Requests (for API integration), Tkinter (for GUI development).

AtliQ Hardware Sales Insights Analysis

- Built an interactive Power BI dashboard, enabling stakeholders to track sales performance and inventory insights.
- Analyzed over 10,000+ records using DAX and SQL queries, uncovering key business trends.
- Improved data accuracy by implementing advanced data-cleaning techniques, reducing errors by 15%.
- Tools Used: Power BI, Excel.

Certifications and Achievements

- Certified Alpha & Beta Microsoft Learn Student Ambassador.
- Certified Google DSC Volunteer & Python Programmer.
- Awarded LinkedIn Premium Subscription for outstanding contributions.
- Received MLSA Swag Kit from Microsoft headquarters in Washington, USA.
